Welcome to the latest issue of the 'Experts in MS' newsletter

We have details about some interesting webinars coming up, plus information about the new DMT decision making tool and the new quality mark for trusted health information.

NeuroResponse webinar

NeuroResponse is a service that enables people with MS in North and Central London to get quick and easy 24/7 access to clinicians at NHS

111 to aid early detection of urinary tract infections - helping reduce the need for GP appointments and unnecessary hospital attendances.

Many people living with MS experience urinary tract infections, however getting appropriate advice and treatment can be a challenge. In this webinar we will share how an MS community came together to co-design NeuroResponse, the barriers and enablers of innovation in the NHS, and explore experiences to see how 'people power' can transform care delivery. And you'll find out how to access this innovative service.

New DMT decision making tool

Help your patients or clients start a conversation about treatment. Our online DMT tool doesn't tell them which ones they can or should have, but matches DMTs to their lifestyle choices. It covers all DMTs (and HSCT) available in the UK, Channel Islands and Isle of Man.

PIF Tick

We are a member of the Patient Information Forum, who have recently launched a new **PIF Tick** toolkit to help healthcare professionals provide trusted information to their patients. It includes a directory of more than 85 Trusted Information Creators, sorted by therapy area, and patient resources, including easy-to-use factsheets on spotting false health information, BMI and clinical evidence.
